PART 1 Dealing with RT Communication

TASK A : RT Role-Play(Voice Only)

- Task takers will **listen to the real life ATC audio clip twice**, which may contain non-standard phraseology or inefficient RT communications and abnormal/unexpected situation.
- Task takers can **take a note** while listening.
- Task takers are supposed to comprehend the RT situation by listening to the audio clip provided. Afterward, Task taker will replay the role of the pilot in the RT situation.
- Task takers will be a pilot of **Hotel Lima one two three**.
- Interviewer is an air traffic controller of the that situation or other pilots as well.
- Interviewer will **play the role depending on the specified situation provided from the audio clip**.
- Task takers are supposed to **provide a response based on your comprehension of RT situation**, not from memorization.
- Task takers don't need to respond exactly the same as the pilot in the audio clip.

Task B. Presenting an Idea about a Role Play

Task taker will Have a **30 seconds** to study the situation replayed.

(Sample Question)

Describe what occurred in the Audio Clip that you just heard?

Explain the nature of the incident.

PART 2 Dealing with RT Aviation Topics

Task A. Picture Description & Evaluation(two pictures)

Look at the picture provided. **You have 15 seconds** to study the picture.

Then answer the questions provided from the interviewer.

(Sample Pictures)

Task B. Express idea about Work-related topic

Task taker will Have a **15 seconds** to study the situation replayed.

(Sample Question)

What would you do if your captain or first officer is incapacitated during flight and is no longer able to assist you in flying the aircraft?

☞ Additional questions can be followed depending on your discourse.

Task C. stating opinion

Task taker will Have a **15 seconds** to study the situation replayed.

(Sample Question)

Weather planning is important for both general aviation pilots and commercial line pilots. From the perspective of a commercial airline pilot, what are the relationships between pre-flight weather planning, in-flight weather information, and evaluating in-flight weather conditions? Are there any differences between general aviation and commercial aviation?

☞ Additional questions can be followed depending on your discourse.
